

Zeeshan Khan

Project Lead - .Azure Certified Developer | .NET | React | Agentic AI

I have 12+ years of experience in enterprise web application development with expertise in .NET, React, and the Azure stack. My experience spans the full development lifecycle, including analysis, design, prototyping, implementation, and team leadership. Recently, I have been actively working with AI-driven solutions, including agentic workflows, MCP servers, connectors, and building AI agents using RAG and embedding-based databases.
